

What does the ST6355 interface connect to

Overview

It facilitates communication between the engine's electronic control unit (ECU) and your boat's instrumentation. By transmitting data such as RPM, engine temperature, fuel consumption, and fault codes, the cable helps in monitoring the engine's performance and diagnosing issues. SmartMotion ST355 is an industrial cellular router intended for wireless communication in mobile networks that make use of LTE, HSPA+, UMTS, CDMA, EDGE or GPRS technology. The router is equipped with two independent cellular modules for backed up communication. Note: The wireless transceivers ship from the factory as a matched pair. If needed. Instantly share code, notes, and snippets. 17464789/17464789 _____ 0s 0us/step 1641221/1641221 _____ 0s 0us/step GitHub Gist: star and fork AshwinD24's gists by creating an account on GitHub. Installing an interface cable on your Tohatsu MFS25C or MFS30C can transform your boating experience, offering real-time data to prevent such surprises. All documents are interlinked, supporting use cases where related information is connected in a flow, making sure we guide users in handling Ericsson.
