

What kind of sealant should be used for cable trays

Overview

Pyroplex Pressure Exerting Sealant expands multi-directionally when exposed to elevated temperatures, exerting pressure to seal and prevent the passage of fire and smoke through service penetrations. Pyroplex Pressure. In providing integral thermal and acoustic retention and protection, cable entry seals are essential to the security and function of your electrical system, with the safety of any external disturbances and internal hazards. FIRSTO fire stops are developed as a modular system which is simple to assemble around the cable run against the wall or on the floor. Where cables pass through shafts, walls, slabs, or enter electrical panels or cabinets, openings shall be tightly sealed. WSP weatherstops are designed to seal penetrations of any type in walls or floors by cable tray, cable conduit, pipe and/or bus duct.
