

# What type of battery is suitable for outdoor server racks

## Article Overview

Lithium Iron Phosphate (LiFePO<sub>4</sub>) batteries are the most suitable choice for outdoor server racks due to their safety, long lifespan, and wide temperature tolerance.

### Recommended Battery Type

For outdoor server racks, LiFePO<sub>4</sub> (Lithium Iron Phosphate) batteries are highly recommended. These batteries offer:

- High safety and stability, reducing the risk of thermal runaway compared to traditional lithium-ion or lead-acid batteries .
- Long cycle life, often exceeding 6,000–8,000 cycles, and a lifespan of 10 years or more, which is ideal for critical IT infrastructure .
- Wide operating temperature range, making them suitable for outdoor environments where temperatures may fluctuate beyond standard indoor ranges .
- Compact, rack-mountable design, allowing easy integration into standard server racks without occupying excessive space .

### Key Features for Outdoor Use

When selecting a battery for outdoor server racks, consider the following:

- Temperature tolerance: Batteries should operate reliably in both high and low temperatures. LiFePO<sub>4</sub> batteries with built-in thermal management systems are ide...
