

Which optical splitter is of good quality

Article Overview

The best optical splitter depends on your application: for fiber networks, PLC splitters are preferred; for home audio, BlueRigger 1×2 or LiNKFOR 1×3 splitters are top choices.

Fiber Optic Network Splitters

For communication networks, Planar Lightwave Circuit (PLC) splitters are generally superior to Fused Biconical Tapered (FBT) splitters. PLC splitters offer:

- High reliability and uniform signal distribution across multiple outputs
 - Wide wavelength support, making them versatile for different network setups
 - Temperature stability, ensuring consistent performance in varying environments
- FBT splitters are more cost-effective but are limited in wavelength support, sensitive to temperature changes, and may provide uneven signal splitting, making them less suitable for large-scale or critical networks .

Optical Audio Splitters

For home audio setups, the choice depends on the number of outputs and supported formats:

- BlueRigger Digital Optical Audio Splitter 1×2: Ideal for connecting one source to two devices. Supports LPCM 2.0, Dolby Digital, and DTS 5.1 formats. Features gold-plated connectors and low-jitter fiber for high-quality audio. Lifetime warranty and US-based support enhance reliability
