

Wiring method for Level 3 distribution box

Article Overview

A Level 3 distribution box typically uses a five-wire system with three-phase lines, a neutral, and a grounding wire, arranged according to load type and safety standards.

Wiring Overview

Incoming Lines:

- Use a five-wire system: three-phase lines (A, B, C), one neutral line, and one grounding line ().
- Phase colors: A – yellow, B – green, C – red; Neutral – light blue; Ground – yellow with green stripes ().
- For 220V loads, connect one phase, neutral, and ground.
- For 380V three-phase loads, connect all three phases plus ground; neutral is required if local control is used.
- Special two-phase 380V equipment can use two phases plus ground as needed.

Connection Points:

- Incoming lines connect to the main circuit breaker or air switch.
- Neutral wires are pressed to the neutral terminal block.
- Ground wires are pressed to the grounding terminal block ().

Wiring Arrangement

- Circuit breakers should be arranged from left to right, with reserved positions typi...
