

XM distribution box factory inspection

Overview

Streamline inspections using standardized checklists and Standard Operating Procedure (SOP) templates that allow photo and video documentation. Address packaging defects, assign corrective actions, and track their progress with real-time monitoring tools and robust analytics. XM Low voltage distribution box is sorted into lighting and motor control box, including common type, outdoor type, with observation window. Both recess mounting and indoor wall mounting can be supplied according to customer requirement. Forget cookie-cutter. Detailed description: The switchboard is designed for use in office and administrative buildings, commercial facilities, and residential premises in general AC 50 Hz distribution networks with a rated voltage of 220/380 V. The design allows for the installation of control devices. The distribution. XM Cabinet is widely used in lighting distribution systems of power station, transformer station, factory, mine, hotels, apartment, buildings, port, railway station, airport, warehouse, hotels etc. [xlsx](#)) template to download the file or click the.
